PROFESSIONAL SUMMARY

Full Stack Developer with 2+ years building production systems in Node.js, React, and Solidity. Focused on performance optimization, scalable architecture, and robust API design. Experience includes microservice backends, real-time data pipelines, smart contract development, and integrating external APIs. Proven track record delivering measurable improvements: 35% API response reduction, 40% data-sync optimization, and 25% deployment acceleration.

TECHNICAL SKILLS

Languages: TypeScript · JavaScript · Python · Solidity · Rust

Frontend: React.js · Next.js · Tailwind CSS · Wagmi · ethers.js

Backend: Node.js · Express.js · REST APIs · GraphQL · JWT/RBAC · Zod

Data & Infrastructure: PostgreSQL · MongoDB · SQLite · Redis · Docker · CI/CD

Web3 & Blockchain: Solidity · ERC-20/ERC-721 · Stellar Soroban · Hardhat · IPFS · Ethers.js · Web3.js

Dev Tools & Practices: Git · GitHub Actions · ESLint/Prettier · Jest · Docker · Nginx · Postman · Bun · Hono · API Design

Additional Languages: Go

WORK EXPERIENCE

Full Stack Developer (Contract) | AdsUp Technology | Jan 2024 – Present

Reduced API response time by 35% through query optimization, Redis caching, and connection pooling—improved user experience across 500+ endpoints.

Cut data-sync overhead by 40% by redesigning event-driven pipeline with Node.js worker threads and message queue optimization.

Shipped 5+ production features end-to-end (React + Express + PostgreSQL) with zero critical post-deploy issues.

Accelerated deployment cycle by 25% via CI/CD pipeline automation and Docker containerization.

Implemented 3-tier RBAC with JWT refresh-token rotation and secure session management.

Freelance Full Stack Developer | Web Wizards | Jan 2023 – Feb 2024

Delivered 5+ client projects on schedule: SPAs, REST APIs, and Web3 wallet integrations.

Built reusable React/Next.js component libraries reducing new-project setup time by ~30%.

Integrated ethers.js and Wagmi for wallet authentication and on-chain data reads.

KEY PROJECTS

B2B Virtual Try-On API Platform · Node.js · TypeScript · REST API · AI Integration

Multi-tenant SaaS API for enterprise e-commerce: per-key usage metering, rate limiting, and webhook callbacks. Server-side image processing pipeline rendering photorealistic garment overlays. Stripe-based billing with tiered plans and partner onboarding workflow.

AURA — Web3 Agent with Persistent Memory · Solidity · Rust (Soroban) · IPFS · Smart Contracts

Smart contract-triggered agent combining ERC-721 identity anchoring, IPFS-backed memory storage, and event-driven execution. Memory layer designed for verifiable, persistent agent state across chain interactions.

Financial Dashboard REST API · Node.js · Express · SQLite · JWT · RBAC

Complete backend for multi-role analytics dashboard: Admin/Analyst/Viewer RBAC tiers. Zod schema validation and JWT refresh-token flow for secure, stateless authentication. Comprehensive Postman collection for team QA and API testing.

CryptoXbros — Crypto Community & Content · Co-founder

Built and scaled Telegram community to 500+ active traders; daily market analysis and trading strategies. Content creation: YouTube channel covering DeFi, blockchain development, and Web3 trends.

EDUCATION

Master's in Blockchain Development · Jetking Infotrain, Noida (2023–2024)

Bachelor of Computer Applications (BCA) — CGPA 8.55/10 · Khalsa College Patiala (2020–2023)

CERTIFICATIONS

Soroban Smart Contract Developer — Stellar Development Foundation

IBM Generative AI Engineering Professional Certificate — In Progress
